

RECEX[®]

Now the best production fastener on the market even goes to work for you in your aftermarkets. RECEX[®] gives you all the production advantages of the square recess design plus cross-slots to accommodate your retailers and wholesalers. For production efficiency without aftermarket hassles, insist on RECEX[®].

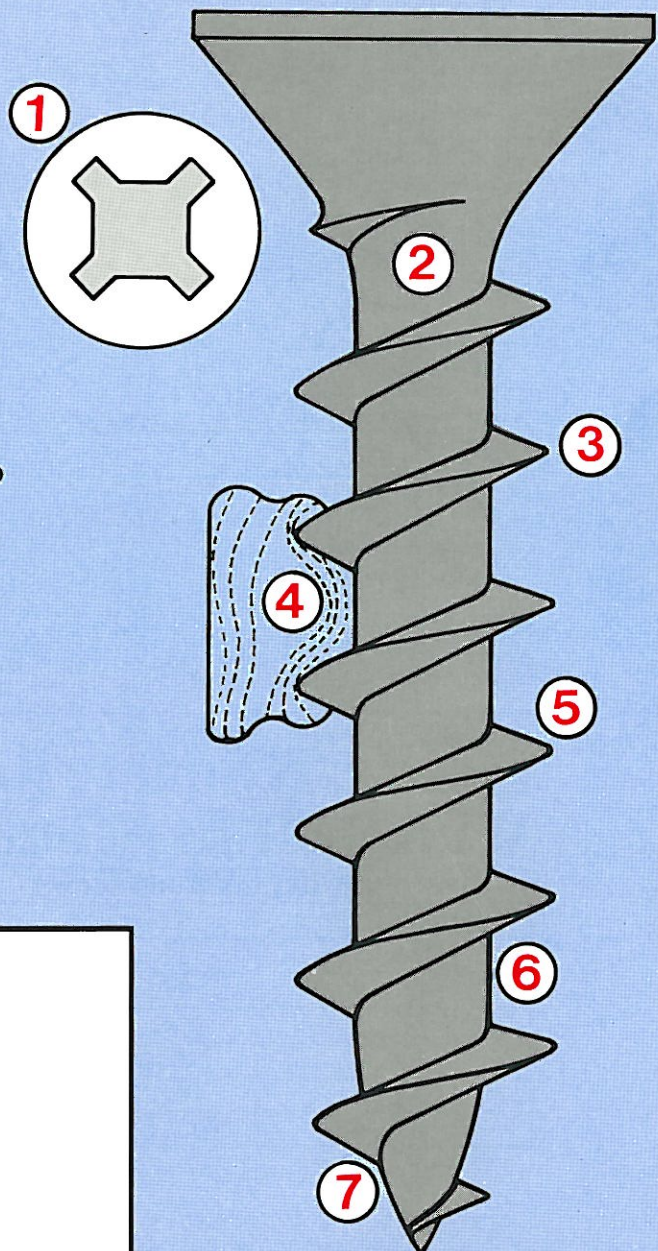

Factor These Variables Into Your Current Production Costs.

With RECEX[®] You Can Count On:

- Longer Bit Life
- No Reaming Or Cam-Out
- Increased Productivity
- Faster Driving Times
- Freedom From Slippage & Marring
- Operator Preference
- Reduced Operator Fatigue, Plus
- Built-In Aftermarket Serviceability

RECEX[®] LO-ROOT[®] Features:

- 1) Square recess and cross-slot combination permits the use of production drivers in the plant and Phillips screw drivers in your aftermarkets.
- 2) Heat treated steel for maximum strength.
- 3) Sharp thread angle cuts into material and prevents splitting, cracking and bursting.
- 4) Optimum thread depth to thread spacing ratio minimizes crumbling between threads.
- 5) Thread surface nearly perpendicular to screw axis provides greatest resistance to pullout.
- 6) Minimum body diameter minimizes material distortion.
- 7) Sharp point and rapid rise provides easy penetration and full thread after first revolution.
